| Storage | | Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μ g/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody. | | | | | | | |
| Specificity / Sensitiv | vity Alix (3A9) Mouse | Alix (3A9) Mouse mAb detects endogenous levels of total Alix protein. | | | | | | | |
| Source / Purification | Monoclonal antibo | Monoclonal antibody is produced by immunizing animals with full-length recombinant human Alix protein. | | | | | | | |
| Background | coil region and a (gene 2)-interactin processes, such a (endosomal sortin | Alix, a phylogenetically conserved cytosolic scaffold protein, contains an N-terminal Bro1 domain, a coiled- coil region and a C-terminal proline-rich domain (1,2). Originally identified as an ALG-2 (apoptosis-linked gene 2)-interacting protein involved in programmed cell death (3,4), Alix also regulates many other cellular processes, such as endocytic membrane trafficking and cell adhesion through interactions with ESCRT (endosomal sorting complex required for transport) proteins, endophilins, and CIN85 (Cbl-interacting protein of 85 kDa) (5,6). | | | | | | | |
