<b>Applications:</b> WB, IP	Reactivity: H	Sensitivity: Endogenous	<b>MW (kDa):</b> 68, 70	Source: Rabbit	UniProt ID: #Q8WV28	Entrez-Gene Id: 29760	
Product Usage Information	Application			Dilution			
	We	Western Blotting			1:1000		
	Im	Immunoprecipitation			1:100		
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 $\mu$ g/ml BSA and 50% glycerol. Store at – 20°C. Do not aliquot the antibody.					
Specificity / Sensit	· <b>,</b>	Phospho-BLNK (Tyr96) Antibody detects endogenous levels of BLNK only when phosphorylated at tyrosine 96. The antibody may cross-react with phospho-SLP-76 in T cells.					
<b>Source / Purification</b> Polyclonal antibodies are produced by immunizing animals with a synthetic phosphopeptide correction to residues around Tyr96 of human BLNK. Antibodies are purified by protein A and peptide affinite chromatography.							
Background	B cr ass at it pho pho sigr patl	B cell linker protein (BLNK), also known as SLP-65 or BASH, is an adaptor molecule that plays key roles in B cell activation and B cell antigen receptor (BCR) engagement. BLNK acts at the interface between BCR-associated Syk and downstream signaling cascades (1,2). BLNK has multiple SH2 binding motifs (YXXP) at its amino terminus and an SH2 domain at its carboxy terminus. After BCR ligation, BLNK is phosphorylated by Syk at multiple YXXP motifs, including Tyr72, Tyr84, Tyr96, and Tyr178 (1). These phosphorylated motifs provide docking sites for signaling molecules, such as BTK, PLCy, and Vav. These signaling molecules bind to BLNK through their SH2 domains and together activate downstream signaling pathways (3,4). Through its SH2 domain, BLNK can also interact with tyrosine-phosphorylated targets, such as HPK1, thereby recruiting them to the BCR complex for signaling (5).

**Species Reactivity** 

Species reactivity is determined by testing in at least one approved application (e.g., western blot).

IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X TBS, Western Blot Buffer 0.1% Tween® 20 at 4°C with gentle shaking, overnight.
