For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: WB	Reactivity: H M R	Sensitivity: Endogenous	MW (kDa): 200	Source: Rabbit	UniProt ID: #P49815	Entrez-Gene Id: 7249	
Product Usage Information	Application Western Blotting			Dilution 1:1000			
Storage		oplied in 10 mM sod C. Do not aliquot the		5), 150 mM NaCl, 100 $\mu g/ml$ BSA and 50% glycerol. Store at –			
Specificity / Sensitivity		Phospho-Tuberin/TSC2 (Ser1254) Antibody detects endogenous levels of tuberin only when phosphorylated at serine 1254. This antibody does not detect tuberin phosphorylated at other sites.					
Source / Purification		Polyclonal antibodies are produced by immunizing animals with a synthetic phosphopeptide corresponding to residues surrounding Ser1254 of human tuberin. Antibodies are purified by protein A and peptide affinity chromatography.					
Background	tum scle widd Pho In a S6 I initia p38	Tuberin is a product of the TSC2 tumor suppressor gene and an important regulator of cell proliferation and tumor development (1). Mutations in either <i>TSC2</i> or the related <i>TSC1</i> (hamartin) gene cause tuberous sclerosis complex (TSC), an autosomal dominant disorder characterized by development of multiple, widespread non-malignant tumors (2). Tuberin is directly phosphorylated at Thr1462 by Akt/PKB (3). Phosphorylation at Thr1462 and Tyr1571 regulates tuberin-hamartin complexes and tuberin activity (3-5). In addition, tuberin inhibits the mammalian target of rapamycin (mTOR), which promotes inhibition of p70 S6 kinase, activation of eukaryotic initiation factor 4E binding protein 1 (4E-BP1, an inhibitor of translation initiation), and eventual inhibition of translation (3,6,7). p38-activated kinase MK2 (MAPKAPK-2) phosphorylates Ser1254 of tuberin, and thus augments the interaction between tuberin and 14-3-3 (8).

Species Reactivity Species reactivity is determined by testing in at least one approved application (e.g., western blot).

Western Blot Buffer IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X TBS,

0.1% Tween® 20 at 4°C with gentle shaking, overnight.

Applications Key WB: Western Blotting

Cross-Reactivity Key H: human M: mouse R: rat Hm: hamster Mk: monkey Vir: virus Mi: mink C: chicken Dm: D. melanogaster

X: Xenopus Z: zebrafish B: bovine Dg: dog Pg: pig Sc: S. cerevisiae Ce: C. elegans Hr: horse

GP: Guinea Pig Rab: rabbit All: all species expected
