#		3 Trask Lane Danvers	Massachusetts 01923 USA		

For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: WB, IP	Reactivity: H M R Mk	Sensitivity: Endogenous	MW (kDa): 141	Source: Rabbit	UniProt ID: #Q8N3U4	Entrez-Gene Id: 10735		
Product Usage Information	W	pplication /estern Blotting nmunoprecipitation			Dilution 1:1000 1:100			
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA and 50% glycerol. Store at – 20°C. Do not aliquot the antibody.						
Specificity / Sensitivity		STAG2 Antibody detects endogenous levels of total STAG2 protein. This antibody does not cross-react with other STAG proteins, including STAG1 and STAG3.						
Source / Purification		Polyclonal antibodies are produced by immunizing animals with a synthetic peptide corresponding to the human STAG2 protein. Antibodies are purified by protein A and peptide affinity chromatography.						
Background Background Refe	add me are cor (3, cot cle pro cot rep rences 1. F 2. E 3. H 4. H 5. H	he cohesin complex consists of a heterodimer between SMC1 (SMC1A or B) and SMC3, bound by diditional RAD21 and STAG proteins (STAG1, 2, or 3) (1,2). These proteins form a ring-like structure that ediates the cohesion of two sister chromatids after DNA replication in S phase (1,2). RAD21 and STAG2 e phosphorylated by Polo-like kinase (PLK) during prophase, which leads to the dissociation of cohesin omplexes from the chromosome arms; however, cohesin remains bound to centromeres until anaphase (4). RAD21 is cleaved by separin/ESPL1 in anaphase, which leads to dissociation of the remaining ohesin from centromeres, enabling sister chromatids to segregate during mitosis (5). RAD21 is also eaved by caspase-3 and caspase-7 during apoptosis, resulting in a 64 kDa carboxy-terminal cleavage oduct that translocates to the cytoplasm and may help to trigger apoptosis (6,7). In addition to mediating ohesion of sister chromatids, the cohesin complex plays important roles in gene regulation and DNA pair, as SMC1 and SMC3 are both phosphorylated by ATM and ATR kinases upon DNA damage (1,2). Peters, J.M. et al. (2008) <i>Genes Dev</i> 22, 3089-114. Barbero, J.L. (2009) <i>Cell Mol Life Sci</i> 66, 2025-35. Hoque, M.T. and Ishikawa, F. (2001) <i>J Biol Chem</i> 276, 5059-67.
