#		3 Trask Lane Danvers Ma	ssachusetts 01923 USA	

For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: WB, IP	Reactivity: H M R Mk	Sensitivity: Endogenous	MW (kDa): 62	Source: Rabbit	UniProt ID: #Q13114	Entrez-Gene Id: 7187			
Product Usage Information	We	plication estern Blotting munoprecipitation			Dilution 1:1000 1:50				
Storage	•	plied in 10 mM sodiu C. Do not aliquot the), 150 mM NaCl, 10	0 $\mu\text{g}/\text{ml}$ BSA and 50% g	lycerol. Store at –			
Specificity / Sens		TRAF3 Antibody detects endogenous levels of total TRAF3 protein. Cross reactivity was not detected with other family members at physiological conditions.							
Source / Purificat		Polyclonal antibodies are produced by immunizing animals with a synthetic peptide corresponding to a central region within TRAF3. Antibodies were purified by protein A and peptide affinity chromatography.							
Background	surf pror dom Zinc inte act	TRAFs (TNF receptor-associated factors) are a family of multifunctional adaptor proteins that bind to surface receptors and recruit additional proteins to form multiprotein signaling complexes capable of promoting cellular responses (1-3). Members of the TRAF family share a common carboxy-terminal "TRAF domain", which mediates interactions with associated proteins; many also contain amino-terminal Zinc/RING finger motifs. The first TRAFs identified, TRAF1 and TRAF2, were found by virtue of their interactions with the cytoplasmic domain of TNF-receptor 2 (TNFRII) (4). The six known TRAFs (TRAF1-6) act as adaptor proteins for a wide range of cell surface receptors and participate in the regulation of cell survival, proliferation, differentiation, and stress responses.							
Background Refe	2. C 3. B	 Arch, R.H. et al. (1998) <i>Genes Dev</i> 12, 2821-30. Chung, J.Y. et al. (2002) <i>J Cell Sci</i> 115, 679-88. Bradley, J.R. and Pober, J.S. (2001) <i>Oncogene</i> 20, 6482-91. Rothe, M. et al. (1994) <i>Cell</i> 78, 681-92. 							
Species Reactivit	t y Spec	Species reactivity is determined by testing in at least one approved application (e.g., western blot).							
Western Blot Buf		IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.							
Applications Key	WB	WB: Western Blotting IP: Immunoprecipitation
