For Research II	se Only Not	for Use in Dia	gnostic Procedures.
FUI RESEAICII U	Se Only, NOL	IUI USE III DIa	gnoslic Procedures.

	Reactivity: Sensi H M R Mk Endog		: Source/Isotype: Rabbit IgG	UniProt ID: #Q13330	Entrez-Gene Id: 9112		
Product Usage	Application			D	ilution		
Information	Western Blott	ting		1:	1:1000		
	Immunohisto	Immunohistochemistry (Paraffin) 1:50			:50		
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μ g/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.					
	For a carrier fr	For a carrier free (BSA and azide free) version of this product see product #54408.					
Specificity / Sensitiv	ity MTA1 (D40D1	MTA1 (D40D1) XP $^{\textcircled{B}}$ Rabbit mAb recognizes endogenous levels of total MTA1 protein.					
Source / Purification		Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to residues near the carboxy terminus of human MTA1 protein.					
Background	metastatic and member of the upregulated un (4,5). MTA1 is malignancy ar	MTA1 (metastasis associated gene 1) was identified in a differential screening of a cDNA library of metastatic and nonmetastatic adenocarcinoma cell lines (1), and was subsequently found to be an integral member of the nucleosome remodeling and deacetylation (NuRD) complex (2,3). MTA1 expression is upregulated under hypoxic conditions and found to enhance angiogenesis through stabilization of HIF-1 α (4,5). MTA1 is overexpressed in a wide range of human cancers, and its expression is associated with malignancy and tumor progression (6). MTA1 is an essential downstream effector of c-Myc transformation (7). Recently, MTA1 was demonstrated to play a role in DNA damage response (8,9).
