Product Description	This Cell Signaling Technology antibody is conjugated to flow cytometry analysis in human cells. The antibody is ex reactivity as the unconjugated Cleaved PARP (Asp214) (I	xpected to exhibit the same species cross-
Background	PARP, a 116 kDa nuclear poly (ADP-ribose) polymerase, to environmental stress (1). This protein can be cleaved b one of the main cleavage targets of caspase-3 <i>in vivo</i> (4, Asp214 and Gly215, which separates the PARP amino-te carboxy-terminal catalytic domain (89 kDa) (2,4). PARP h PARP facilitates cellular disassembly and serves as a ma	by many ICE-like caspases <i>in vitro</i> (2,3) and is 5). In human PARP, the cleavage occurs between erminal DNA-binding domain (24 kDa) from the nelps cells to maintain their viability; cleavage of
