or Research Use Only. Not for Use in Diagnostic Procedures.						
Applications: WB, IHC-P, IF-IC	Reactivity: H M R Hm Mk	Sensitivity: Endogenous	<b>MW (kDa):</b> 55	Source/Isotype: Mouse IgG2b	UniProt ID: #P07437	Entrez-Gene Id 203068
Product Usage Information	Арр	Application				
	Wes	Western Blotting				1:1000
	Imn	Immunohistochemistry (Paraffin)				1:400
	Imn	Immunofluorescence (Immunocytochemistry)				1:100
Storage	Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 $\mu$ g/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at $-20^{\circ}$ C. Do not aliquot the antibody.					
For a carrier free (BSA and azide free) version of this product see					e product #28164.	
$\textbf{Specificity / Sensitivity} \qquad  \beta\text{-Tubulin (D3U1W) Mouse mAb recognizes endogenous levels of total } \beta\text{-tubulin}$					of total β-tubulin prote	ein.
Source / Purifica		Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to the amino terminus of human $\beta$ -tubulin protein.				
Background	The	The cytoskeleton consists of three types of cytosolic fibers: microtubules, microfilaments (actin filaments),				

and intermediate filaments. Globular tubulin subunits comprise the microtubule building block, with α/βtubulin heterodimers forming the tubulin subunit common to all eukaryotic cells, v-tubulin is required to nucleate polymerization of tubulin subunits to form microtubule polymers. Many cell movements are mediated by microtubule action, including the beating of cilia and flagella, cytoplasmic transport of membrane vesicles, chromosome alignment during meiosis/mitosis, and nerve-cell axon migration. These movements result from competitive microtubule polymerization and depolymerization or through the actions of microtubule motor proteins (1).

1. Westermann, S. and Weber, K. (2003) Nat Rev Mol Cell Biol 4, 938-47. **Background References** 

**Species Reactivity** Species reactivity is determined by testing in at least one approved application (e.g., western blot).

IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v nonfat dry Western Blot Buffer

milk, 1X TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.

**Applications Key** WB: Western Blotting IHC-P: Immunohistochemistry (Paraffin)

**IF-IC:** Immunofluorescence (Immunocytochemistry)

H: human M: mouse R: rat Hm: hamster Mk: monkey Vir: virus Mi: mink C: chicken Dm: D. melanogaster **Cross-Reactivity Key** 

X: Xenopus Z: zebrafish B: bovine Dg: dog Pg: pig Sc: S. cerevisiae Ce: C. elegans Hr: horse

GP: Guinea Pig Rab: rabbit All: all species expected

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the **Limited Uses** 

following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in

writing by a legally authorized representative of CST, are rejected and are of no force or effect.

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner β-Tubulin (D3U1W) Mouse mAb (#86298) Datasheet Without Images Cell Signaling Technology that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
