NextGENe®

Network Version Setup Guide

Configure Server Computer

- Log on to the Windows Server as a Local Administrator. In order to meet User Account Control settings, you may also need to right-click on the NextGENe setup and choose Run As Administrator.
- 2. Choose to Install License Server Manager. NOTE: This program monitors available licenses from clients that are running NextGENe. It should be installed on a Server or a computer that is always running. The License Server Manager can be installed on the same computer that will be running NextGENe.
