## For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: WB	Reactivity: H M	Sensitivity: Endogenous	<b>MW (kDa):</b> 15	Source: Rabbit	<b>UniProt ID:</b> #P15090	Entrez-Gene Id: 2167	
Product Usage Information		Application Vestern Blotting			Dilution 1:1000		
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA and 50% glycerol. Store at – 20°C. Do not aliquot the antibody.					
Specificity / Sens		-	4 Antibody detects endogenous levels of total FABP4 protein. This antibody may cross react with FABP family members.				
Source / Purificat				munizing animals with a synthetic peptide corresponding to the re purified by peptide affinity chromatography.			
Background	ch (2 ac hii su de de ar hu	Fatty acid binding proteins (FABPs) bind to fatty acids and other lipids to function as cytoplasmic lipid chaperones (1). They participate in the transport of fatty acids and other lipids to various cellular pathways (2). The predominant fatty acid binding protein found in adipocytes is FABP4, also called adipocyte fatty acid binding protein or aP2. FABP4 is also expressed in macrophages (3). FABP4 knockout mice fed a high-fat and high-calorie diet become obese but develop neither insulin resistance nor diabetes, suggesting that this protein might be a link between obesity and insulin resistance and diabetes (4). Mice deficient in both FABP4 and ApoE show protection against atherosclerosis when compared with mice deficient only in ApoE (3). Mice carrying a FABP4 genetic variant exhibit both reduced FABP4 expression and a reduced potential for developing type 2 diabetes and coronary heart disease. A related study in humans indicated a similar pattern, suggesting that FABP4 may be a potential therapeutic target in the treatment of these disorders (1).					
Background Refe	2. 3.		Spener, F. (2004) 01) <i>Nat. Med.</i> 7, 6				
Species Reactivit	<b>y</b> Sp	ecies reactivity is deter	mined by testing i	n at least one appro	ved application (e.g., we	stern blot).	
Western Blot Buf		PORTANT: For western % Tween® 20 at 4°C w		nembrane with diluted primary antibody in 5% w/v BSA, 1X TBS, g, overnight.			
Applications Key	w	WB: Western Blotting					
Cross-Reactivity	X:		B: bovine Dg: dog	Ik: monkey Vir: virus Mi: mink C: chicken Dm: D. melanogaster 9 Pg: pig Sc: S. cerevisiae Ce: C. elegans Hr: horse s expected
