For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: IF-F, IF-IC	Reactivity: R	Source/Isotype: Goat
Product Usage Information	The optimal dilution of the anti-species antibody should be determined for each primary antibody by titration. However, a final dilution of 1:500 - 1:2000 should yield acceptable results for immunofluorescent assays.	
Storage	Supplied in 0.1 M sodium phosphate, 0.1 M sodium chloride, pH 7.5, 5 mM sodium azide. Store at 4°C. <i>Do not aliquot the antibody. Protect from light. Do not freeze.</i>	
Specificity / Sensitivity	IgG is prepared from goat antibodies that have been adsorbed against mouse IgG, mouse serum and human serum. Cross-reactivity with mouse primary antibodies has been observed.	
Product Description	Anti-rat IgG (H+L) antibody was conjugated to Alexa Fluor® 555 fluorescent dye under optimal conditions and formulated at 2 mg/mL.	
Background	This product has been optimized for use as a secondary antibody in immunofluorescent applications. Fluorescent anti-species IgG conjugates are ideal for flow cytometry and immunofluorescence. Cell Signaling Technology's strict quality control procedures assure that each conjugate provides optimal specificity and fluorescence.	
Species Reactivity	Species reactivity is determined by testing in at least one approved application (e.g., western blot).	
Applications Key	IF-F: Immunofluorescence (Frozen) IF-IC: Immunofluorescence (Immunocytochemistry)	
Cross-Reactivity Key	H: human M: mouse R: rat Hm: hamster Mk: monkey Vir: virus Mi: mink C: chicken Dm: D. melanogaster X: Xenopus Z: zebrafish B: bovine Dg: dog Pg: pig Sc: S. cerevisiae Ce: C. elegans Hr: horse GP: Guinea Pig Rab: rabbit All: all species expected
