#				3 Trask Lane Danvers Ma	ssachusetts 01923 USA	
For Research Use O	nly. Not for Use in	Diagnostic Prod	cedures.			
Applications: IP	Reactivity: All	Sensitivity: Transfected Only	Source/Isotype: Mouse IgG2a kappa			

	Only kappa				
Product Usage Information	Application Immunoprecipitation	Dilution 1:20			
Storage	Supplied in PBS Buffer (pH 7.2), 0.1% Tv	$en^{ entire{B}}$ 20. Store at 4°C. Do not aliquot the antibodies.			
Specificity / Sensitivity	Myc-Tag (9B11) Mouse mAb (Magnetic Bead Conjugate) detects exogenously expressed proteins containing the Myc epitope tag. This antibody recognizes the Myc tag fused to either the amino or carboxy terminus of targeted proteins in transfected cells. Myc-Tag (9B11) Mouse mAb (Magnetic Bead Conjugate) detects exogenously expressed Myc-tagged proteins in cells expressed under a CMV promoter. Expression under other promoters has not been evaluated.				
	The antibody may cross-react with c-myc unknown origin ~90kDa.	protein. The antibody may weakly cross-react with a protein of			
Source / Purification	Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to residues 410-419 of human c-Myc (EQKLISEEDL).				
Product Description	This Cell Signaling Technology antibody is immobilized by the covalent reaction of hydrazinonicotinam modifed antibody with formylbenzamide-modified magnetic bead. Myc-Tag (9B11) Mouse mAb (Magn Bead Conjugate) is useful for immunoprecipitation assays of Myc epitope-tagged proteins.				
Background	Epitope tags are useful for the labeling and detection of proteins using immunoblotting, immunoprecipitation, and immunostaining techniques. Because of their small size, they are unlikely to affect the tagged protein's biochemical properties.				
	The Myc epitope tag is widely used to de and mammalian cell systems (1).	tect expression of recombinant proteins in bacteria, yeast, insect,			
Background References	1. Munro, S. and Pelham, H.R. (1984) EA	<i>IBO J</i> 3, 3087-93.			
Species Reactivity	Species reactivity is determined by testing	in at least one approved application (e.g., western blot).			
Applications Key	IP: Immunoprecipitation				
Cross-Reactivity Key	activity KeyH: human M: mouse R: rat Hm: hamster Mk: monkey Vir: virus Mi: mink C: chicken Di X: Xenopus Z: zebrafish B: bovine Dg: dog Pg: pig Sc: S. cerevisiae Ce: C. elegans H GP: Guinea Pig Rab: rabbit All: all species expected
