| Storage                      | Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.  |   |   |  |  |  |  |
| Specificity / Sensitivity    | ALPP (3E5C7) Mouse mAb recognizes endogenous levels of total ALPP protein. This antibody may cross-<br>react with a protein of unknown origin at ~140 kDa in some cell lines.   |   |   |  |  |  |  |
| Source / Purification        | Monoclonal antibody is produced by immunizing animals with a recombinant protein fragment specific to human ALPP protein.   |   |   |  |  |  |  |
| Background                   | Mammalian alkaline pho<br>able to hydrolyze and tra<br>alkaline phosphatase is<br>(germ cell), and ALPI (in<br>membrane via a glycosy<br>and may be involved in<br>surface of several differe<br>ALPP-like enzymes has  | osphatases (APs)<br>ansphosphorylate<br>ozymes: TNAP (t<br>itestinal) (2).
