CD71 (D7G9X) XP <sup>®</sup> Rabbit mAb (PE Conjugate)		ell Signaling сн N о L о g Y®
	Orders:	877-616-CELL (2355) orders@cellsignal.com
82	Support:	877-678-TECH (8324)
#82582	Web:	info@cellsignal.com cellsignal.com
	3 Trask Lane   Danvers   Ma	ssachusetts   01923   USA
For Research Use Only. Not for Use in Diagnostic Procedures.		

Applications: React FC-FP H		UniProt ID:Entrez-Gene Id:#P027867037
Product Usage Information	Application	Dilution
mormation	Flow Cytometry (Fixed/Permeabilized)	1:50
Storage	Supplied in PBS (pH 7.2), less than 0.1% sodium azide an antibodies. Protect from light. Do not freeze.	d 2 mg/ml BSA. Store at 4°C. Do not aliquot the
Specificity / Sensitivity	CD71 (D7G9X) XP <sup>®</sup> Rabbit mAb (PE Conjugate) recognize	es endogenous levels of total CD71 protein.
Source / Purification	Monoclonal antibody is produced by immunizing animals w residues surrounding Leu146 of human CD71 protein.	vith a synthetic peptide corresponding to
Product Description	This Cell Signaling Technology antibody is conjugated to p flow cytometry analysis in human cells. This antibody is ex reactivity as the unconjugated CD71 (D7G9X) XP <sup>®</sup> Rabbit	pected to exhibit the same species cross-
Background	Transferrin receptor 1 (CD71, TFRC) is a type II transmem for the uptake of cellular iron through receptor-mediated er promotes binding of the iron-binding glycoprotein transferri complex enters the cell through receptor-mediated endocy. Relatively lower endosomal pH leads to a change in the low transferrin binding site and results in the release of iron (2) cell surface where transferrin dissociates from the CD71 re- receptor is continuously recycled and undergoes clathrin-m binding state. The interaction between receptor and ligand of CD71 directly interacts with the transferrin C-lobe and in the transport process (3). Interaction between the receptor membrane protein hemochromatosis (HFE). HFE binds the of the CD71-transferrin complex and inhibiting iron uptake also interacts with H-ferritin at the cell surface and transpon cellular endosomes and lysosomes (6). Additional studies i evolutionarily conserved receptor for a number of arenaviru expression of CD71 is seen in a number of cancers, includ lineage leukemias, suggesting a possible therapeutic role f (9,10).	hdocytosis (1). Neutral pH at the cell surface n (Tf) to the CD71 receptor. The receptor-ligand tosis and is internalized into an endosome. cal charge environment surrounding the iron- . The receptor-ligand complex is recycled to the eceptor (2). Ubiquitously expressed transferrin hediated endocytosis regardless of ligand has been studied in detail. The helical domain duces a conformation change in Tf to facilitate CD71 and transferrin is mediated by the e a-helical domain of CD71, blocking formation (4,5). In addition to binding transferrin, CD71 rts this intracellular iron storage protein to ndicate that the transferrin receptor is an uses and at least one retrovirus (7,8). Aberrant ing thyroid carcinomas, lymphomas, and T-

Limited Uses	Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.
	Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
