Integrin α5 (D7B7G) Rabbit mAb

Applications: WB	Reactivity: H M R Hm Mk	Sensitivity: Endogenous	MW (kDa): 150	Source/Isotype: Rabbit IgG	UniProt ID: #P08648	Entrez-Gene Id: 3678		
Product Usage Information		lication stern Blotting			Dilution 1:1000			
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.						
Specificity / Sens	itivity Integ	Integrin $\alpha 5$ (D7B7G) Rabbit mAb recognizes endogenous levels of total Integrin $\alpha 5$ protein.						
Source / Purificat		Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to residues surrounding Gly117 of human Integrin α 5 protein.				esponding to		
Background Background Refe	as w 24 kr trans intrac Integ and t cell a cell a 2. Ho 3. va 4. Ka 5. Kir	Integrins are α/β heterodimeric cell surface receptors that play a pivotal role in cell adhesion and migration as well as in growth and survival (1,2). The integrin family contains at least 18 α and 8 β subunits that form 24 known integrins with distinct tissue distribution and overlapping ligand specificities (3). Integrins not onl transmit signals to cells in response to the extracellular environment (outside-in signaling), but also sense intracellular cues to alter their interaction with the extracellular environment (inside-out signaling) (1,2). Integrin $\alpha 5/\beta 1$ is involved in multiple biological processes including embryonic development, angiogenesis and tumor metastasis (4,5). By interaction with its fibronectin ligand, $\alpha 5/\beta 1$ transduces signals that regulat cell adhesion, migration, matrix assembly and cytoskeletal organization (6). 1. Liu, S. et al.
