## NextGENe®

**Local Version Installation Guide** 

- 1. Log on to the computer as a Local Administrator. In order to meet User Account Control settings, you may also need to right-click on the NextGENe setup and choose Run As Administrator.
- 2. Choose to install NextGENe.

🚽 Select Program 🛛 💌	
Install NextGENe(Recommended)	
O Install License Server Manager	
O Install License Server Manager and NextGENe	
Annotation Database(Recommended)	
Customize Installation	
Important!	
The License Server Manager is needed for users running this product in a Network Configuration. The License Server Manager must be installed on the Server. It is not to be installed on Client Computers. Choosing to install the Annotation Database will configure a MySQL database that contains gene annotation information and dbSNPs
